

President's Letter

October 1, 2014

The weather here has been dry and hot lately. I have been trying to work outside and it is necessary to take cool breaks now and then. We may have some rain and cooler weather later this week. I sure hope so. I bet the weather will be nice for the shoot.

I have had some advice about the bullets that do not hit the target that I was talking about last month. A reliable source told me that if, when a bullet is picked up and the round end is pointed to the left, that bullet will be a miss. That got my mind to working and I am going to order a custom mold that is pointed on each end so that there will be no possibility of missing the target. This is the same reliable source that told me if you are using nails to repair something, that if the head of the nail is on the wrong end when it is picked up, don't throw it away, as it is for the other side of the project. He also told me to plant grass green side up. He sure seems to know a lot.

Several years ago, we had a cowboy show up at a match while he was on leave from the military. I only know him by the name he used at the match, "Cowboy". He said he was on a medical leave and was awaiting release to go back to Afghanistan. He brought his picture album to the next day match along with a flag that was flown over three different bases when he was there. He presented the club with the flag, and information about it that will be covered in the November news letter. After that, we never saw him again. Wherever he is, we wish him well. We will fly that flag at the special Veterans shoot on November 29

Words of Wisdom: If you practice how to do things wrong, you will eventually get good at it.

Justa Hand, President
