

President's Letter

May 2015

The Cowboy God's have really been smiling on us recently. For both our May monthly shoot, and the TSRA State Championship match. Both weekends had weather predicted to be rain and storms, but all the really bad weather split and went right around us. The weather was overcast with just a few drops now and then, but not enough rain to wet the shooters. In other words, the weather was wonderful.

June begins our summer dress code. If it is hot and you just can't stand the heat and humidity, either because of age, medication you may be taking, or just because it makes you uncomfortable, you can wear shorts, short sleeve shirts and comfortable and cool shoes. We don't want anyone to have heat related medical problems when they can easily be avoided. Don't forget to drink plenty of liquid to keep hydrated. The Temperance Hall will be available to cool off anyone that becomes overheated. Be safe and take care of yourself.

Remember, your club can always use your help in keeping the range in good shape. If you are retired or off work on the days before a monthly match, your help in setting up the range would be greatly appreciated. People are just as needed to clean up and put away things after the match is over. We have good people doing this now, but they could sure use your help. Did I mention the social value of volunteering yourself for the benefit of others? Volunteers and regular workers usually go out to eat on Friday nights for a great fellowship event.

I have discovered a few more Government conspiracies recently. Probably the biggest one is the gradual change to the weights and measurements systems. Have you noticed that the noted weights on different packages of things has gradually been decreased? A twenty pound bag of potatoes now shows to be 10 pounds. And something has been added to Milk to make a gallon weigh almost twice as much. Distances have changed too. "They" have changed the distance of a City block to almost double. And they have put the parking lots of Wal Mart farther away from the front door of the store. I suppose this has something to do with our First Ladies physical improvement program. What do you think?

Remember, muzzle up.
Justa Hand
